

# Making Buildings That Make Our Builders The Best.

## Commercial Buildings

Metal building systems adapt well to many commercial applications such as office buildings, shopping centers, banks, and automobile dealerships.

Curb appeal is important, and the versatility of a metal building system allows the integration of many different façade materials that provide visually appealing structures.

The MESCO Long Bay® System has an open, uncluttered interior, which allows for fluid, interior flexibility. We also offer the following features for our commercial building applications:

- Aesthetically pleasing appearance
- Standard and custom design options
- Fast and economical construction
- Ease of expansion
- Ongoing durability
- Reduced maintenance costs
- Long-term energy savings
